Box No. I Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

This opinion has been established on the basis of a translation from the original language into the following language \_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

a sequence listing  
 table(s) related to the sequence listing

b. format of material

in written format  
 in computer readable form

c. time of filing/furnishing

contained in the international application as filed.  
 filed together with the international application in computer readable form.  
 furnished subsequently to this Authority for the purposes of search.

3.  In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Reference is made to the following document :

D1 : JP 12-161878 A ( Furukawa electric Co., Ltd) 16 Jun 2000

D2 : US 6097602 A (Marian, Inc.) 01 Aug 2000

D3 : US 2003/0129863 A1 (International Business Machines Corporation) 10 Jul 2003

D4 : US 2004/0080915 A1 (Koninklijke philips electronics N.V.) 29 Apr 2004

**1. Novelty and Inventive Step:**

The present invention relates to a flat-case heat transfer device composed of mesh aggregate having a structure of plural layers of coarse mesh and fine mesh. The coarse mesh is woven in a crossed wire inside the flat case . The thermally conductive flat case accommodates a coolant which absorbs and evaporates heat from the heat source, and then emits the heat and is condensed simultaneously at the heat emitting unit.

D1,D2, D3 and D4 do not involve these features and the claimed device can not be derived from the prior arts easily. Therefore, the present invention satisfies the regulations of PCT Article 33(2) & (3).

**2. Industrial Applicability:**

Since the heat transfer device of the present invention obtains heat stability of a product by dissipating the heat from the heat source of the electronic appliances, it satisfies the regulations of PCT Article 33(4).
